played it through long ago and now again for about the 3rd time, and its as good as i remembered. the end levels are unforgiving though and most likely you wont have many lives left when you get there, so you'll spend time playing through the game many times over learning the mechanics for them (and especially last boss fights). with a 90% coupon you can triple your stuff back. This game is absolutely terrible. The controls are near to impossible to handle, there are no full control dictation of the helicopters. meaning you just pull up to the area and it swithces views and modes. the graphics are almost horrendious to begin with. I am glad i got this game on sale and only spent .69 cents for it. but even then. the game is barely worth that.. It's a combo of Kenshi, Terraria and [insert survival sandbox type game here] in a rimworld-style setting. IMO it's already worth a buy, but it's being improved so if you want to wait it's up to you.

I say get it, if you're open-minded.. Nice idea, waiting for further development. A solid game, I really like it. You manage a team of gladiators that you control in tactical turn based battles.

You win money with these, and have to decide how to invest it: training, equipment, new team members.

Graphics is a bit outdated, but the game concept is great. Many hours of fun for a good price.. i got this from a bundle and wow. I mean if you are looking at this game to get i have no idea what you are into but this game just sucks. it is a game where you wrap stuff with rope, i dont know if anyone enjoys that but i find it hard to believe. if you are looking to buy this, you sir really dont know what are good games and bad games.. The Kaukauna port wine cheese log of shoot 'em ups.. this game is alright. Isabella Von Carstine comes with her bae Vlad Von Carstein, they get there own questline, trait and skills and tbh Manfred Von Carstein needs some competition. Its not often we get female leaders so i think this dlc is really cool. And im happy she won the competition Creative Asembly had that i forgot the name of. So yes have at it!

Mega frenzy:

Ea dis crap reminds me of good onld times. Not a bad 2d under sea food chain game if thats what ya looking for.. I bought this for the simple reason that I want to understand 4x4 driving techniques. I know nothing about it in real life. Just from the tutorial I learnt a lot. It seems pretty good in terms of providing the theory and the concepts behind it all. Obvs there is no comparison to the real thing but for a beginner I found it helpful at the price point. (<AUD\$10) I am not interested in the racing competitive side of it though, so other than a few goes round to get the hang of the concepts I am not sure it has much scope beyond that for me. was worth the \$ though.. Really fun to play.. No wonder it was so cheap, its as bad as a game you would get for free in a box of cereals.. My fatigue didn't increase.. This is taken from a comment I wrote on YouTube a while ago, I'm posting it here as my review. Edited it a little, also.

I have the game on the PlayStation 3 too (don't ask why I have it for both the PC and PlayStation 3). To be honest, I prefer *Worms 4: Mayhem* (I only have it for the PC, pirated copy from 2005/2006). It has better game-play (it's better for battling, Roping, navigating, etc. and don't ask why, hard to explain it), better tweaks (Is it even possible to tweak *Worms: Ultimate Mayhem*? I have the PC version of the game and I don't know how to tweak it. There are no ".xml" files.), better music (this is my opinion, the *Worms: Ultimate Mayhem* music is great too, they're remixes of the old *Worms 4: Mayhem* tracks, but it really sucks that they took out the old *Worms 4: Mayhem* Sudden Death theme, they could have made a remix of that), better online play (They removed the Wormpot for online games in *Worms: Ultimate Mayhem*! How could they do this to us?! And you can't actually pick your own team in *Worms: Ultimate Mayhem* for online play, it picks one of your teams automatically, and it doesn't display the name of the team at the beginning of your turn, it simply shows your player name instead.), better HUD... They even removed the Icarus Potion Cheat in *Worms: Ultimate Mayhem*! I have 12 *Worms* games, including *Worms Armageddon* (the so-called "best game in the series", yes, it may be the best 2D game), and *Worms 4: Mayhem* was always my favorite, and *Worms: Ultimate Mayhem* is a very close second (and *Worms 3D* is third, but not that close). Yes, the new HD graphics for *Worms: Ultimate Mayhem* are nice, so are the new sound effects and the new "Credits" screen (it has humorous cut-scenes), and I like the Binoculars (although I was hoping for all *Worms 3D* weapons mixed with the *Worms 4: Mayhem* weapons), the new online features are also nice (such as "Ranked Match", but I still prefer the *Worms 4: Mayhem* online system), and they also added all the *Worms 3D* maps as well, along with the *Worms 3D* Campaign, which is very important. But, to be honest, I don't think they'll ever make a game that could top good old *Worms 4: Mayhem*.

As for *Worms: Ultimate Mayhem*, the PC and PlayStation 3 versions are equally as good. For the PC version, you could change the controls for your keyboard and controller too, which is very important. In the PlayStation 3 version, you can't change the controls for your controller, you can only choose three default sets for all controls on the controller ("Goofy", "Classic", and "Mayhem"). But for the PlayStation 3 version, there's a larger limit to the amount of characters for weapon and Game Style names, which is also very important. It also has a sufficient amount of characters for team names. For the PC version, it only has a large enough character limit for team names, not weapon or Game Style names. So, as I said, they're both equally as good.

But in general, I'd highly recommend this game. It's one of the best I've ever played.. COME FOR THE LINE V STAY FOR THE DASH
